Safe Medicine for Children

"Is it safe?" is the first question to be considered when buying cough medicine for children. Chamberlain's Cough Remedy has long been a favorite with mothers of young children as it contains no opium or other narcotic, and may be given to a child as confidently as to an adult. It is pleasant to take too, which is of great importance when a medicine must be given to young children. This remedy is most effectual in relieving coughs, colds and croup.

too, right there,—don't be afraid,—that's it,—feel how smooth the skin is? Well, that's where the corn was. Well, that beats all! That's the way "Gets-It" works on all corns, every corn, every time. It's the new, simple way of curing corns. You'll say goodbye to all foolish contraptions like bandaging, sticking tape, plasters, toe-eating salves, and grave-diggers such as knives, razors and scissors. "Gets-It" stops pain. Applied in 2 seconds. Never fails. Nothing to stick to, hurt or press on the corn.

ing children in France and her allies. Also for the wounded in the drive on Verdun. Contributions will be received by Miss Ida Stewart, the local secretary.

CHRISTIAN ENDEAVOR SOCIETY WILL MEET

The local Christian Endeavor Society will meet at 8 p. m. Sunday at the new West cottage. Topic, "Good Prayer Meetings, and How to Have Them Always"—Acts 12, 1-17. Delbert Norman, leader. Committee chairmen are asked to have their reports. A cordial invitation is extended to everybody.

WHO IS RESPONSIBLE?

For many years there has been a dispute between the city and the Lehi Irrigation company as to who is responsible for maintaining culverts and bridges across the ditches on the streets of the city. The city proposes to put the question to a test, and Tuesday night passed an ordinance compelling the irrigation company to maintain the flumes. The attorneys for the two parties hold contending opinions. It will now probably be tested in the courts.

THIRD NORTH TO BE GRADED.

A contract was let by the Orem road this week to Hyrum C. Evans to surface Third North street with gravel from Second East to Fourth East street. The contract calls for 1,000 yards, and will be hauled from the gravel pits above town. The railroad company will also raise its track to the sidewalk grades where it crosses the several streets. This will greatly improve the crossings.

NIGHT POLICE APPOINTED.

Ed Street has been appointed Special police to help the city marshal take care of the peace of the city. He will act as general night watch. The work or task of doing the work both night and day was too much for the marshal alone.

CHICKEN THIEVES GET 60 DAYS.

Judge Webb served notice on chicken thieves that henceforth they will get no mercy from him. Carl Goss and Noel Whiting, who pleaded guilty to stealing chickens, were each sentenced Saturday to serve 60 days in jail. They are now working at odd jobs for the city on the streets, parks, etc. Delbert Coggin, the other young man arrested in the deal, stood trial and was acquitted.

WILL INCORPORATE COMPANY TO EXPLOIT INVENTION

W. J. Higgs is planning to incorporate a company to handle his pick-handle device, which he recently patented. The pick handle is so constructed that in prying on the pick the strain all comes on the end of the handle instead of sideways. It is impossible to break a Higgs pick handle by lifting on it, and one handle will answer for any number of picks if used one at a time. It is easily put on and easily removed, and one handle will last the lives of a dozen picks. It can also be used for sledge hammers, claw hammers and other similar implements where the handles fit into an eye.

MONEY IN ALFALFA SEED.

Many of the farmers west of Jordan river are planting their farms to alfalfa, as this seems to be the crop best adapted to that soil, it being too close for root crops and the irrigation being too high for grain.

One farmer last year grew about \$90 worth of alfalfa seed per acre, besides a first crop alfalfa hay and having the seed chaff for feed. In growing seed the alfalfa has to be somewhat stunted and then given a good irrigation to fill out the seed. Conditions in the new district seem to be ideal for this kind of treatment and the coming year more farmers will grow seed.

The so-called "big institution" is not entitled to anything because of its size.

As a matter of fact, it is up to such an organization to prove that it deserves patronage as much as does the small individual merchant.

Too many times these larger institutions like ourselves, are simply too big to give painstaking care to small things.

If you can't get these things with the same sympathetic response as though you wanted a carload, then the establishment is too big to be worth bothering with.
